

## MARCH

### Helen

When PETA fieldworkers first met Helen, the petite tabby needed urgent medical attention for a ruptured cornea, likely due to living in a cramped, filthy space with numerous other stressed cats. Fortunately, her owner agreed to let PETA take her for emergency care and ultimately find her a new home. As her fosterers nurtured her back to a healthy, pain free life, they fell in love with the sweet, charming feline, and she joined their happy family. Helen enjoys sunbathing during the day, having sunset adventures in her stroller in the evenings, and spending quality time with her feline best friend and mentor, Brandi.
